Glen L. Pule

SA Citizen | lesegopule148@gmail.com | 075 305 9546 | LinkedIn: www.linkedin.com/in/glen-pule | GitHub: GLPule

Data Analyst graduate with a Bcom in Computer Science & Information Systems, skilled in Excel, SQL and Python for data cleaning, analysis and visualization. Proven ability to transform raw data into actionable insights through hands on experience analyzing student datasets and building reports. Seeking to contribute to data driven decision making in financial services.

EDUCATION

Nelson Mandela University **Port Elizabeth, Gqeberha**

BCom Computer Science & Information Systems *Completed, Apr 2026*

- **Concentrations:** Software Development, Information Systems, Data Analysis
- **Related Coursework:** Computing in C# & Java, Data Structures & Algorithms, Objects & Design, Object-Oriented Programming, Computer Applications

PROJECTS

Portfolio (Html, CSS, JavaScript)

WEB base: https://glpule.github.io/Portfolio/

- It is a web based, developed using Visual Studio Code.

Financial Transaction & Fraud Analysis (Excel)

GitHub: https://github.com/GLPule/financial-transaction-fraud-analysis

- Analyzed financial transaction data to identify fraud patterns and risk indicators
- Detected that fraud is highly concentrated in CASH_OUT and TRANSFER transactions
- Developed risk indicators including transaction size, balance depletion and anomaly detection
- Built an interactive Excel dashboard to visualize transaction behavior and fraud distribution
- Generated insights on fraud patterns including rapid fund transfer and withdrawal behavior

Customer Spending Analysis (Excel)

GitHub: https://github.com/GLPule/customer-spending-analysis

- Analyzed transactional retail data using Microsoft Excel to identify spending patterns and customer behavior.
- Built interactive dashboards using pivot tables and charts to visualize key metrics such as revenue, average transaction value and group size trends.
- Identified peak sales periods and high frequency customer segments, providing insights for business decision making.
- Translated raw data into actionable insights, highlighting revenue drivers and customer trends.

Credit Risk Analysis Project (Excel)

GitHub: https://github.com/GLPule/credit-risk-analysis

- Analyzed over 400 000+ credit card applicants to identify default risk patterns
- Merged and transformed multiple datasets to create a customer risk classification model
- Developed an interactive dashboard highlighting default rates by income, employment, demographics and risk category
- Identified key risk drivers including employment stability and income segmentation
- Generated actionable insights to support credit decision-making and risk assessment

EXPERIENCE

Nelson Mandela University **Port Elizabeth, Gqeberha**

Student Assistance (COMPUTER APPLICATIONS AND PROGRAMMING) *Mar 2023 – Jun 2023*

- Assisted lecturers in the Computing Sciences Department with academic and administrative support.
- Supported students in modules WRAV101(Programming Fundamentals 1a) and WRFV101(Computing Fundamentals 1.1), clarifying concepts and assisting with coursework and practical tasks.

- Helped with marking, tutorial support and learning material preparation.
- Developed strong skills in communication, problem-solving, time management and technical support within an academic environment.
- Worked collaboratively with academic staff to support effective teaching and student learning

ACTIVITIES AND LEADERSHIP

METROREZ Student Accommodation **Port Elizabeth, Gqeberha**
Student Leader *Jan 2025 – Oct 2025*

- Analyzed student intake data using Microsoft Excel, improving reporting accuracy and supporting operational decision making
- Cleaned and structured datasets to ensure data consistency and usability
- Created visual reports and dashboards to communicate insights to management
- Identified patterns in student data to assist with accommodation planning

CERTIFICATIONS

WeThinkCode_GenAI Course for Software Engineers *Mar 2026*

- Learned prompt engineering, generative AI tools and applying AI in software development

Sololearn *2026*

- Learned about Python and Java

SKILLS

Data Analysis: Microsoft Excel (data cleaning, pivot tables, visualization), SQL (data querying, joins, aggregation), Python (pandas, matplotlib)
Tools: VS Code**,** Git
Platforms: Windows, Linux
Honors: Golden Key International Honour Society
Interests: Basketball, Body-building, Video games
